

ABSTRACT

It is an object of the present invention to provide a hard coat film, excellent in resistance to impact and weather, high in surface hardness, and in particular suitable for being stuck on the external surfaces, e.g., those of window panes or plastic boards for windows. In the hard coat film of the present invention, a silicone-based hard coat layer is provided on one side of a multi-layered base composed of a plurality of the same or different resin films laminated.
